EAST PASADENA, CALIF.,

September 1936

MEMORANDUM

This list has much new material, which will be of real interest to your customers and attract new and desirable prospects. Nothing will make a stronger appeal and increase your sales volume than your reputation for having something unusual to offer, in addition to a well rounded-out line of fresh, well grown general nursery stock.

TERMS: we will allow discounts of 5% for cash with order or C.O.D.; as well as a quantity discount of 10% on orders of 500 or more of one variety.

Packing at actual cost

Now is the time to plan to be ready to take care of an increasing future demand by a careful selection of your lining-out stock for immediate canning, potting and planting. There is a shortage in many lines of fresh first-class nursery stock. So place your order now and we will reserve the plants until you are ready to receive them.

Those nurseries who have the fore-sight to keep up the quality, variety and quantity of their stock will emerge from the depression stronger and more permanently established.

We feature only quality stock and guarantee you entire satisfaction.

F - Fast Growing                      M - Medium Growing                      S - Slow Growing

Name	Size Pots	Price Per 100	Remarks

Iochroma lanceolata (purple fls.)-----	F 2½"	7 00	Cuttings
Iris kaempferi, Japanese, selected-----	M "	8 00	Seedlings

1. The first part of the report deals with the general situation of the country and the progress of the work during the year. It is divided into two main sections: the first section deals with the general situation and the second section deals with the progress of the work.

2. The second part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work in the field and the second section deals with the results of the work in the laboratory.

3. The third part of the report deals with the conclusions of the work during the year. It is divided into two main sections: the first section deals with the conclusions of the work in the field and the second section deals with the conclusions of the work in the laboratory.

4. The fourth part of the report deals with the recommendations of the work during the year. It is divided into two main sections: the first section deals with the recommendations of the work in the field and the second section deals with the recommendations of the work in the laboratory.

5. The fifth part of the report deals with the summary of the work during the year. It is divided into two main sections: the first section deals with the summary of the work in the field and the second section deals with the summary of the work in the laboratory.

6. The sixth part of the report deals with the appendix of the work during the year. It is divided into two main sections: the first section deals with the appendix of the work in the field and the second section deals with the appendix of the work in the laboratory.

7. The seventh part of the report deals with the bibliography of the work during the year. It is divided into two main sections: the first section deals with the bibliography of the work in the field and the second section deals with the bibliography of the work in the laboratory.

8. The eighth part of the report deals with the index of the work during the year. It is divided into two main sections: the first section deals with the index of the work in the field and the second section deals with the index of the work in the laboratory.

9. The ninth part of the report deals with the list of figures of the work during the year. It is divided into two main sections: the first section deals with the list of figures of the work in the field and the second section deals with the list of figures of the work in the laboratory.

10. The tenth part of the report deals with the list of tables of the work during the year. It is divided into two main sections: the first section deals with the list of tables of the work in the field and the second section deals with the list of tables of the work in the laboratory.
